

## About Me

My name is Ananta Sharma. I am currently staying in Pokhara, Nepal. I am a passionate learner and technology enthusiast. I am pursuing a Bachelor's degree in Computer Applications at Tribhuvan University, where I am gaining a solid foundation in computer science and software development. My journey with computers began at a young age, sparked by my curiosity and fascination with technology. Since then, I have been deeply interested in coding and programming. I enjoy the process of problem-solving and the creativity involved in software development. My current focus is on mastering languages like HTML, CSS, JavaScript, and PHP to build responsive and dynamic web applications. I am also exploring various frameworks and tools to enhance my skills further. In addition to coding, I have a keen interest in graphic design and digital art. I believe in lifelong learning and continuous growth, both personally and professionally.

## Education

### Bachelor of Computer Applications

Tribhuvan University, PN Campus, Pokhara
